

Butterfly valve,

High Performance Eccentric
Double Flanged

Dimensjon	Trykk	Temperatur	Utførelse
DN 50-900 (2"-36")	PN 10-40 (Class 150-300)	-40°C til +250°C	Dobbelflenset

Description

Dynaxe eccentric butterfly valve is at the forefront of its field with proven technology for high pressure, critical applications and erosive and corrosive media. The Dynaxe solid design provides reliability and long service life.

Soft or metal sealed butterfly valves with assembly flange in both ends. Due to a double flange execution this design can be used as end valve and inline service. The valve has proven double eccentric technology and can be delivered in several material combinations. Suitable for most applications including vacuum.
