

Butterfly valve,

High Performance Triple Offset
Wafer

Dimensjon	Trykk	Temperatur	Utførelse
DN 50-1200 (2"-48")	PN 20-150 (Class 150-900)	BS 6364 (-196°C), API 609 & ASME B16.34	Wafer Innspenning

Description

Our Triple offset design ensures safe function and tightness even in case of changing cryogenic temperatures or case pressure peaks. This geometry ensures that the body seal contacts the disc only at the final shut-off position without rubbing or galling.

Triple offset butterfly valve for mounting in between flanges with centering lugs. Not recommended to be used as end valve, see rather Lug type with fully lugged flanges. Made with continuous spindle and metal sealed seats. Spindle extension of a minimum of 250mm is always included for cryogenic applications. Other project-specific requests are of course welcome.
