

Ball Valve

All-welded

AT 3590, 3591

Dimension range DN 10-300	PN 25	Temperature range Max 200 °C	Material Steel
-------------------------------------	-----------------	----------------------------------------	--------------------------

Range of Application

As shut-off valve for cooling and heating systems, compressed air and non combustible gases.

Quality Assurance

CE-marking

Fulfil 97/23/EC PED acc. to

DN 10-40 article 3.3.

DN 50-125: Category I group 2.

DN 150-200: Category II group 2.

DN 250-300: Category III group 2.

Ball Valve

All-welded

AT 3590, 3591

Function and Design

Ball valve in all-welded construction with reduced bore and welding ends for welding in directly.

The ball is fixed between two seat rings of carbon filled PTFE.

As standard, the valve is delivered with extended stem for full insulation and the upper part of stem is visible and inspectable.

Technical Information

Torque at differential 16 bar

DN	25	32	40	50	65	80	100	125	150	200	250	300
Nm	6	8	20	27	40	80	140	200	380	550	1500	1800

Note: To make sure correct dimensioning, the torque has to be multiplied by a factor of 2,0.

Installation

The valve can be mounted in any position independent of the flow direction.

The valve must be welded in with the valve in full open position.

Note, in the case of gas welding the valve must be cooled down to protect the seat rings from damage.

Accessories and Options

The valves can be equipped with locking device (AT 3619) for open and closed

Ball Valve

All-welded

AT 3590, 3591

position.

Separate stem extensions (AT 3603) and lever of stainless steel (AT 3604RF) are available on request. Stem's square-measure has to be specified when ordering. Valve performed with external/internal threads AT 3640.

Maintenance and Spare parts

The valve is a shut-off valve and shall be in full open or closed position.

The valve is maintenance free, but regular checking-up and operating control needs to secure a safe handling and function.

The stuffing box is follow-up draftable.

Marking

Manufacturer, DN, PN, type, year and month of manufacturing are marked on the identification label.
