

Ball valve,

Floating Ball Welded

Dimensjon	Trykk	Temperatur	Utførelse
DN 8-100	PN 10-220	-100°C til +400°C	Sveisestuss

Description

Ball valve where the ball is floating in between two or more seats. The pressure is pushing the floating ball against the downstream seat which creates a seal.

3-part ball valve with full or reduced bore. Standard materials in cast iron, carbon steel and stainless steel. The duplex and special alloys are available on request. Supplied with Namur mounting flange for easy actuator assembly.
